

AIR QUALITY Solutions PROVEN to Reduce the Spread of COVID-19

BOOST Assisted Living Resident Safety Beyond Masks

When considering a move to Assisted Living, Memory Care, or other elder-care facility, a family's top concern is the welfare of their loved one. They want to find a facility that has best-in-class equipment and procedures to ensure clean, sanitized air and surfaces, and has protocols in place to safeguard against the outbreak and spread of CV-19 and strains of flu or other life-threatening elements.

As we spend more time inside, air sanitizers are required to cleanse the air we breathe. We offer a variety of indoor air quality solutions featuring technologies to meet any facility's needs. These systems work in a variety of room sizes/configurations to safeguard against the outbreak and spread of CV-19 and strains of flu, airborne viruses, bacteria, allergens, pollutants, and more. At Geehan Group, we are investing in these and other technologies to bring best-in-class to meet the needs in all markets. Here is a brief overview of our air purification system solutions and how they address various contaminants.

Product	Size / Coverage	Technology
Gpurify 600	Size: 7"H x 16"W x 7"D Coverage: 600 SF Use: small rooms – sit on table or mount on wall	Technology: <ul style="list-style-type: none"> • Ultraviolet Germicidal Irradiation (UVGI) – internal UVC with photolytic chamber that extends kill time • Pre-filter and carbon filter • Eliminates viruses, bacteria, spores, mold, VOCs, odor, and allergens

Purify the air you breathe

Physically Block Spaces with Sneeze Guards/Barriers

Germs spread via sneezes, coughs, breathing and talking. Our barriers block them and let you function in smaller spaces where you need to eat, greet, study, meet, and/or work with other people. Masks can't block all droplets...our nonporous barriers do. Most health agencies suggest them in situations when you can't be six feet apart.

Our table partitions and barriers come in clear acrylic and translucent dual-wall polycarbonate (for more privacy), in a variety of sizes (see below). All units come with easy to assemble "feet" (for standing), cleaning cloth and instructions for care.

Product	Size	Specifications
Clear Acrylic Barrier	Sizes: 27"H x 24"W 27"H x 36"W 27"H x 48"W	Lightweight, easy to move barriers come with two slide-on feet. High-quality clear nonporous 1/4" acrylic. Pass-through at bottom of unit. 
Dual-wall Polycarbonate Barrier	Size: 22"H x 24"W	Lightweight, easy to move barriers come with one slide-on foot. High-quality dual-wall nonporous 1/4" polycarbonate (translucent) for more privacy. 

Purify the air you breathe

We help senior facilities, restaurants, schools, and businesses boost safety and density, to help provide a healthier, safer environment for all.
