

Rising financial pressures, regulatory demands, more advanced technology solutions and more medically complex patient populations make managing a healthcare facility more challenging today than ever before. Since 2009, PharmScript has been helping healthcare organizations survive, and ultimately thrive, in this demanding environment by providing the innovative technology, service-oriented mindset and rigorous quality assurance they need to manage one of their greatest assets: their pharmacy.

As a pharmacy industry leader, PharmScript partners with long-term and post-acute care facilities across the United States, supplying medications to thousands of residents and patients. Delivering on our commitment to pharmacy excellence, we help our clients provide patient-centered care that is efficient and effective.

## A SEAMLESS EXPERIENCE

### Quality Service

At PharmScript, we prescribe to a higher standard. We aim to exceed expectations in everything we do, from timeliness and accessibility to medication accuracy.

### Cost Containment

Increasing financial and regulatory pressure makes curbing health care costs a priority. We help clients manage their residents to achieve the best clinical outcomes while containing costs.

### Technology

Using innovative and reliable technology, we ensure patients and staff have what they need when they need it, and in the safest and most effective manner.

- Bidirectional EHR Integration
- eMAR
- e-Prescribing
- Remote Emergency Dispensing Machine
- HIPAA-Compliant Two-Way Texting
- Online On-Demand Records and Reporting through the PS Portal
- Mobile App Coming Soon

## TESTIMONIALS

Over the past 2 years, our relationship with PharmScript has demonstrated that they not only understand our core business, but also anticipate what is needed to continuously improve pharmacy services and enhance other aspects of our operations through value-added services, industry knowledge and consultation. PharmScript truly listens to their customers and adapts services around this knowledge. I would highly recommend them to other nursing facilities who may be considering a change.

Michael A. Landi, Chief Operating Officer  
**ICARE HEALTH NETWORK**

PharmScripts is a valued business partner of Focused Post Acute Care Partners because they truly care about the residents we serve in this industry. They put the residents first and provide a premier pharmacy experience. Their team communication is exceptional and they will be there to assist at a moment's notice with anything we need. The PharmScript team wants not only the residents to be well cared for, but they also care for our entire organization and want us to be a successful organization.

Becky Anderson, Chief Nursing Officer

PHARMSCRIPT

# Healthy at Home

**PHARMSCRIPT** is dedicated to helping you maintain outstanding patient care by offering our Healthy at Home Discharge Medication program to our customers.

This value added service allows your facility to extend care beyond discharge by offering a 30 day supply, one time fill of all prescribed medications for patients returning home.

As a patient care driven program, we take pride in delivering premiere customer service to both the patient and facility. Additionally, our initiative continues focus on cost containment. Reducing rehospitalization scores as they relate to medication compliance creates the opportunity to optimize CMS reimbursement and achieve desired outcomes.

## What Sets Us Apart

- Specialized user-friendly medication packaging supports patient education
- 24/7 available support from the Healthy at Home team
- Targeted follow up calls to enhance compliance
- No new scripts needed for non-controlled medications
- Dedicated pharmacist conducts clinical review of profiled medications
- Integrates easily with facility discharge workflow

**Patients with low and intermediate medication adherence had a readmission rate of 20% while patients with high adherence had a readmission rate of 9.3%.<sup>1</sup>**
